Nothing is fake in the FAKE coding platform

It is with great emotion that we can announce that the FAKE digital platform is built, tested and validated! We have created a dynamic, interactive, relevant and intelligent online coding platform. Do you want to access it? It's here: https://fakeproject.eu/about/

During several months, the partners have analysed the needs of young people with fewer opportunities: Did they want a very technical platform? What kind of characters should appear on the platform? How to get used to the tools developed?

Today, the platform includes several characters, gendered or not, animals, landscapes, objects. So many elements that make it a platform that reflects young people and their needs. And these same young people are currently building digital stories!

You don't know what they are? These are creative, interesting online stories about the fight against fake news on social networks. Stay tuned, you can discover them on our social networks: https://www.instagram.com/fakeproject.eu/

The Hackathon :

A hackathon is an event during which participants from various backgrounds work intensively on a given theme. They participate in the reflection on common projects with the objective to produce an innovative solution or a prototype in record time. This hackathon will take place during 8 weeks in project FAKE.

⭐ CHALLENGE ! ⭐

For this challenge, you will have to be **ingenious, creative and original**! Indeed, using the **Digital Coding Tool**, you have to develop a **digital project**...but *what kind of project?* One that will help your friends, your family, your entourage to **learn how to detect and fight fake news**. This project can take the form of an **interactive game**, a **visual novel**, or **other type of digital content**. What's important? It's to make users aware of **the fight against fake news**!

Each partner will nominate a **winning project** for their country, which will receive a prize that will be announced at a local event.

But that's not all...At a **final online conference** with all participants from all project partner countries, we will **award the best project** from all the projects that have already won at the local level. You will then receive **another prize if you win**!

⭐⭐⭐⭐⭐

Motivated? Let's get started!
